**DETAILED ACTION**

1. This application is a 371 of PCT/JP99/05964. For applications filed under 371, PCT rules for lack of unity apply.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, and 10-11, drawn to a method for detecting a gene that is influenced by an endocrine disruptor.

Group II, claim(s) 7-9 and 12, drawn to a DNA array for detecting a gene influenced by an endocrine disruptor.

These inventions listed as Groups I-II do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

DeRisi et al. (Nature Genetics, Vol. 14 (4), pages 457-460, 1996) teach a DNA microarray for detecting a gene influenced by endocrine disruptor (tumor suppressor), based on which the instant claims 7-9, and 12 are anticipated and lack special technical feature.

Accordingly, Groups I and II are not so linked by the same or corresponding technical feature as to form a single general inventive concept.

3. This application contains claims directed to the following patentably distinct species of the claimed inventions Group I-II:

- a. a gene selected from 1-17 of claims 2, and 8;
- b. an endocrine disruptor selected from 1-9 of claims 4, 6 and 11.

These species differ in their structure and modes of action and are therefore separate and patentably distinct in view of each other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e. one gene and one endocrine disruptor) for prosecution.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
